Work Was Not Resumed.

BEAVER FALLS, Pa., July 16.—Work was not resumed here yesterday morning at the three plants comprising the Carnegic interest at this place. Superintendent Wrigley, who was at the general office at an early hour, did not receive a single application for work, and the start of the mills has been indefinitely postponed.

The Trial of Alice Mitchell Begun MEMPHS, Tenn., July 19.—The trial of Alice Mitchell on her plea of present insanity was begun in the criminal tourt yesterday morning in the pres-ence of a large number of people. The defence holds that when Alice Mitchell, 19 years old, manifested an aversion for men and loved a maiden 17 years of age with the devotion and intensity of A man and prepared to marry her and planned to clope, she was crazy. The state will contend that Miss Mitchell did have a great regard for young men, and will show that she not only flired with the other sex but that she carried on a voluminous correspondence with men, some of them unknown.

A venire composed of the most prominent business men in the city was summoned, from which a jury selection was made. The work of selecting the jury occupied two hours and shalf. It is composed of the leading business men of Memphis. The only question asked them was whether or not they had an opinion as to Miss Mitchell's

present meanity.

The girl's father was the first witness on the stand, and he told of his wife's temporary insanky when her first child was born, and also her mental absention when Alice was born. Mr. Mitchell wept bitterly in detailing the story, but his daughter smiled as if she thought the matter a huma takes. she thought the matter a huge joke.

Nobody but Usivin S Brice, chairman of the National Democratic committee, who is working convicts in his coal mines in Tennossee in place of striking miners, is conducting a business that exactly suits the Democratic party for it is never happy unless honest labor

A Laboringman's Recollection. A workingman writing to the Obleago Inter-Ocean has shown himself to be ossessed of a good memory and also ability to write about the effect of Democratic free trade. The younger men of our country know nothing of these things and it would be well for those who are so inclined to think serious over the un portant matter of the tariff, which will be passed upon this fall, before voting

This writer truthfully says that the Democratic free-trade party, never had BRANTH OF INDUSTRY control of this government for ten con outive years without reducing the Free Trade Plank of June 22, 1892. wages of the laboring people one-half, and reducing the chances for employ ment in the same ratio, and increasing the price of manufactured actuales, and reducing the price of the products of the American farm The result of this was always destruction of the public credit of the was always destruction of the public credit of the constitution of the constitu the country, and yet, in face of all this, the Democrate have the impudence to

charge protection with being responsible for the riot at Homestead, where the men are paid from \$10 to \$275 a month In strong contrast with these pro tection wages the writer calls attention to the fact that after years of protection and prosperity came the Democratic free trade tariff of 1833 with its horizontal declining scale that reduced duties more year by year, which was passed as a compromise measure to keep South Carolina and some other states in the South from secoding from the Union The result of this tariff was that in 1837 labor had committee on Ways and Me ras in the days of come so depressed, that in the city of

Pittsburg laboringmen, with families, who had prospered previous to the pas only bull cried "Give ne work, give us work at your own terms, our children are hungry and we have no bread for them to est, mechanics went begging for the mutant. work at (4) cents a day and soup houses tlamed you have a rumbling sound or m were opened to keep the unemployed closed, Deafness is the result, and unless the result, and unless the result. from starving After this came the pro-tective tarif of 1842 and everything this tube restored to its normal condi-again became prosperous, but the Democratic party returned to power and reenacted a tariff for revenue only Of the result of this free trade tariff the writer

We will give One Harded Dollars for any case of Desines (caused by catarrh) that we cannot our by taking Hall's desply impressed on the minds of the middle aged citisens, when men were glad to get 50 cents per day in the city of Chicago, and a deliar a day was large wages for mechanics, with little or no work, while the product of English mills was stored on our docks and filled the shelves of every store in the country. In the city of Philadelphia in 1857 the horse car company advertise for 200 men to lay trask. One morning 2,000 of the best mechanics in that industrial city offered themselves to work as laborers at 50 cents a day. I ask the working men of the country to read the chapter in "Darkoet England" that describing the English workman applying for work at the dock gates of an English ship station where thousands gather seeking a few boars work, when only tens are wanted. In their effort to get shead of their fellow slaves they sometimes crush out lives, and almost daily break one another's bones. How like Philadelphia in 1857.

The history of free trade is the history of proverty, desperation and famine, the bilictory of provertion is that of presperity and happiness. Which of these principles are most likely to develop rices like that of Homestead; avery honest wanted in the fill the principles are most likely to develop rices like that of Homestead; avery honest wanted and the fill the principles are most likely to develop rices like that of Homestead; avery honest wanted and the fill the world. From 56c and she began gaining flesh that of Homestead; avery honest wanted and the world. From 56c and she began gaining flesh the series of the fill the world. From 56c and she began gaining flesh the cough to the world. From 56c and she began gaining flesh republication of the middle and the principle and the p

and facts are what the public want, so now the Democrats have drawn protec-tion into the Homestead business I hope Republicans will draw upon history and pour down on these Democrats the oceans of free trade poverty, famine riots, bloodshed, and death that the his-tors of Democrate and free trade have tory of Democracy and free trade gives

AGAINST LABOR UNIONS

dlar Stevenson's Record at Bloom ington with the Coal Miners.

The following telegram from the state capital will attract general attention among union coal miners and others:
Springfield, Ill., July 18.—The coal miners of Illinois are displaying a good deal of interest in the history of the relations between the miners' organization of this state and the MoLean County Coal company at Bloomington, which operates a non-union mine and of which Adlai E. Stevenson, the Democratio nomines for vice-president of the United States, is president. The following communication from a miner, which was published by the State Journal to-day, is said to show what these relations have been and calls atlention to an interesting extract from an official report upon the subject made by a Democratic state mine inspector. among union coal miners and others:

tine inspector. The McLean County Coal company, which Mr. Stevenson is president, in the reputation of opposing and activel fighting every attempt at organizatio among the Bloomington coal miner dating back as far as Mr. Stevenson first connection with said coal compan

dating cace as far as Mr. Stevenson's first connection with said coal company. Yet the poor creatures employed as mine workers by that labor-hating corporation are made to come up before the public had knes the hand that smites them. They are made to tell the public how kindly they have been treated, and that the thoughs of being driven from the mine premises for daring to effect a miners' union was only a dream.

Mr. Stevenson says "the most kindly cordial feeling should ever exist between employes and employer, and that all disputes or disagreements should be settled either by conference or arbitration." Yet the Bloomington mine-workers have no union and never dared to have one. Organizers have been thera, and have been ordered off the premises. On a few coonsions union was effected among those workmen, but as soon as the fact became known, Adiai and his man Ratford banished the efficers of such anion.

During the years of 1885, 1886 and 1887

ished the citicers of such union.

During the years of 1885, 1885 and 1887 when the miners' state and national association organizers and officers were-trying to establish the principle of conference, conciliation and arbitration through union for the amicable adjustment of differences, Adlai and his "echo" were driving away any and all of the Bloomington miners who might presume to encourage such a union for such intel-

on page 383, under the heading of "thrikes":

"There have been only two etrikes in this district during the last year. The first was by the miners employed by the McLean County Coal company at Bloomington. The company having discharged a few of their employes for taking a leading part in forming a union, the miners as a body came out on a strike to have those who had been thus discharged reinstated."

What the printers of Union No. 6 of New York say of Whitelaw Reid and his efforts to assast the typographical Union and to conciliate the differences between said Union and the Tribung office, make a real record of real frandship of American labor that no distant or partisan resolutions can injure, and which shades in such a mountain of darkness the name of Adlai Stevenson that a million "Golden Circles" and "Warrior Knights" can never bring it to appreciate light. can never bring it to appreciate light Upon this question the union miners of illinois and of the whole Nation will have more to say later on in the cam-

Here's What the Plasterers Think of ROCK PLASTER.

WE THE UNDERSIGNED, contracting plasterers, after much experience and observation, take pleasure in testifying to the practical character of ROCK PLASTER, and while it will remove a not inconsiderable amount of business, namely, that of patching, we advocate its use, as it enables us to do work and guarantee the results, and enables us to carry on our trade at all seasons of the year, and modernizes that part of building enterprise which has undergone practically no improvement in the last two thousand years, placing the business of the plasterer on the same footing as that occupied by the other trades through the advent of machinery and improved methods.
